ANNEXURE- I**PART –RECOMMENDATION OF EXPERT COMMITTEE ON BIO-PESTICIDES UNDER THE CHAIRMANSHIP OF DR. A. N. MUKHOPADHAYA, EX VICE-CHANCELLOR, AAU, JORHAT – ACCEPTED BY RC.**

The First meeting of the Expert Committee (EC) was held on 06-02-2014 and deliberated the various issues in detail and decided/ *recommended* as under:

Agenda Item No.1: Relevance of mentioning of the %age of biomass of a biopesticides w.r.t. to efficacy/activity and the biopesticides formulation code.

The agenda was deliberated in detail and Expert Committee elaborated the importance and relevance of mentioning of %age biomass in the chemical composition of product. Accordingly, *it is recommended that the present system of mentioning of %age of biomass in the Certificate of Registration will be continued as this %age biomass is directly related with the CFU count of the product.*

Agenda Item No.2: Only minimum CFU count should be approved and allowed to be mentioned on Certificate of Registration and also on the Labels & Leaflets.

The agenda was deliberated in detail and *EC recommended that only minimum CFU count should be specified as per draft specification of various biopesticides in their Certificate of Registration and also on the Labels & Leaflets, irrespective of higher claim by the applicants supported by Analytical Test Report (ATR) from independent laboratory and / or ATR from Central Insecticide Laboratory, Faridabad at the time of Pre-registration verification.*

Agenda Item No.3: Reconsideration of moisture content, pH range in all Biopesticides.

The agenda was deliberated in detail and the EC explained that the moisture content and pH of any product plays an important role in using & sustaining their shelf life. The moisture & pH may affect the bioefficacy of the product. Both the parameters are vital in maintaining physico-chemical properties of biopesticides formulations which are essentially required for better performance and proper uses. In this matter *it was decided that the moisture content shall be as under:-*

A. Moisture

Sl. No.	Name of the Biopesticides	Type of Formulation	Moisture Limit
1.	<i>Pseudomonas fluorescence</i> and <i>Bacillus subtilis</i> ,	Solid	12% Max.
2.	<i>Bacillus thuringiensis</i> var. <i>israelensis</i> , <i>Bacillus thuringiensis</i> var. <i>kurstaki</i> , <i>Bacillus thuringiensis</i> var. <i>galeriae</i> and <i>Bacillus sphaericus</i>	Solid	8 % Max.

2.	<i>Beauveria bassiana</i>	--do--	--do--
3.	<i>Verticillium lecanii</i>	--do--	--do--
4.	<i>Metarhizium anisopliae</i>	--do--	--do--
5.	<i>Verticillium chlamydosporium</i>	--do--	--do--
6.	<i>Paecilomyces lilacinus</i>	--do--	--do--
7.	<i>Ampelomyces quisqualis</i>	--do--	--do--
8.	<i>Photorhabdous luminescens spp.</i>	--do--	--do--
9.	Ha NPV	--do--	--do--
10.	Spodeptera NPV	--do--	--do--
11.	<i>Trichoderma viride</i>	--do--	--do--
12.	<i>Trichoderma harzianum</i>	--do--	--do--

B. pH:

The pH of all the biopesticides shall be in the range of 7 ± 1 as per approved method of analysis.

Agenda Item No.4: Resubmission of failed samples of biopesticides to CIL for re-analysis.

The agenda was deliberated in detail and the EC had liberal views on resubmission of samples. *Those applicants were permitted to resubmit sample who have cleared CFU Counts and Microbial contaminants tests with the condition that a team of officers (one each Officer from Chemistry and bioefficacy discipline) from Sectt. of CIB&RC may be deputed by APPA and Secretary CIB&RC to inspect the manufacturing activity, infrastructure and draw respective sample(s) for the above purpose from manufacturing premises of the manufacturers. All the expenditure shall be incurred by the respective manufacturers. Accordingly, those applicants who want re-analysis of above said failed samples of biopesticides shall apply to APPA & Secretary (CIB&RC) for drawl of samples.*

Annexure-II**Recommendation of the Group under the Chairmanship of Dr. S.N. Sushil, Plant Protection Adviser on the Guidelines of the Registration for grant of registration of insecticides under various categories****I. Section 9 (4)**

- (i) There is no data requirement for TIT, FIT and FIM categories under Section 9(4) at present and the same should continue.
- (ii) As regards TIM category under Section 9(4), besides the existing data requirement for Chemistry, data for establishing Chemical Equivalence needs improvement. Chemical equivalence should be established on the basis of five recent batch (manufactured within one year) analysis at CIL to show that the chemical composition is identical to that of already registered original registrant.
- (iii) Prior permission of the RC shall be obtained under RTT permit for producing such sample quantities.
- (iv) Present requirement of Acute Toxicity data for this category was kept by the RC as instances of phyto-toxicity despite establishment of Chemical Equivalence were reported. This should be replaced by the AMES Test to decide the safety of the product in view of establishment of chemical equivalence in this manner.
- (v) Certification of fixation of MRL by the bio-efficacy expert shall continue to be an integral part of the scrutiny of applications for grant of registration under this category.

II. Section 9(3)-FIM vs FIT category

- (i) Once a product has been registered under 9(3) FIM category, further registration for the same formulation of the same insecticide with identical

chemical composition may be sought only under Section 9 (4) instead of FIM vs FIT category under Section 9 (3).

- (ii) The same approach should be adopted for registration of pesticides under other categories too.

III. TIM vs TIT and TIT vs TIM categories

- (i) The guidelines dated 05.10.2011, currently displayed on the website, are correct with reference to establishment of chemical equivalence and require no change in this regard.
- (ii) FAO/WHO Pesticides Specification guidelines may be followed in establishing the chemical equivalence and requirement of Bioefficacy and toxicity data should be accordingly decided for TIM cases. However, for TIT cases, besides bioefficacy data, in addition to requirement of toxicity data given in FAO guidelines, acute toxicity tests and mutagenicity tests (minimum three tests including at least one *in vivo* test) shall also be required as in-process sample is not drawn and tested at CIL.
- (iii) The same guidelines may also be applicable to TIT (New Source) category.

IV. Review of guidelines as per para 47 (b) of the Interim Order dated 05.09.2013 passed by the Hon'ble High Court of Gujarat in SCA No. 2530 of 2011

1. Recommendations on 15-year issue

The recommendations in respect of 'new molecule' are as follows:-

- (i) A molecule, which is applied for grant of registration in India within 5 years of its first registration anywhere in the world, may only be considered as a 'New Molecule'.

- (ii) Only new molecules may be considered for grant of registration under 'Registration of formulation without registering its technical under Section 9 (3)'.
- (iii) An affidavit alongwith applications for grant of 'Registration of formulation without registering its technical under Section 9 (3)' shall have to be submitted by the applicant that the molecule for which the application is being made has not crossed five years' period of registration anywhere in the world as on the date of application and that in the event of this affidavit being found wrong, the application/registration of the product shall be liable to be rejected/cancelled and that the applicant shall be liable to legal action "for misleading/cheating" the Registration Committee under the Indian Penal Code.
- (iv) This provision shall be effective from the date of display of the decision of the RC on the website and shall be applicable to applications submitted thereafter.

2. Recommendations regarding para 47 (b)

- (i) Registration of formulations of pesticides without registering technical shall be restricted to the 'new molecules', which are applied for grant of registration in India within 5 years of their first registration anywhere in the world.
- (ii) Registration of formulation in respect of such molecules shall be open to import or indigenous manufacture, as the case may be, without registering the technical.
- (iii) The extant guidelines for registration of formulations without registering technical, for import and for indigenous manufacture, are considered adequate to ensure the bioefficacy and safety of the formulation, and may be continued.

- (iv) Any person, applying for import or indigenous manufacture of formulations without registering technical shall, alongwith the application of registration, also apply for RTT for import or manufacture, as the case may be, of sample quantity of technical grade, adequate to generate shelf-life and packaging data as well as for its testing (alongwith reference standard of technical and impurities) at CIL, and submit the same to the Sectt of CIB & RC before issue of certificate of registration for the formulation.
- (v) The Certificate of Registration of formulation shall be with the specific condition that the data on shelf-life and packaging, generated and complete as per the guidelines of the RC, alongwith Form-I for Technical shall be submitted at least three months before the expiry of three years' period from the date of registration, failing which the certificate of registration of the formulation shall become invalid at the expiry of three years.
- (vi) Soon on receipt of Form-I for the technical, Sectt. of CIB&RC shall refer the sample of technical grade, alongwith reference standard of technical and impurities, for testing at CIL as per procedure. Such report shall be positively given by the CIL within 90 days.
- (vii) The Registration Committee shall evaluate the shelf-life and packaging data, and issue the certificate of registration for technical under section 9 (3) within a period of three month of the date of receipt of Form-I alongwith the data.

(viii) No person shall be allowed to register another formulation or seek label expansion of the same pesticide, a formulation of which is registered without registering the technical, unless the registration certificate of its technical has been issued.

(ix) This decision may be applicable prospectively.
